

Airless Gun **PSAM** **250**

***Control and
reliability
at high
pressure***

The Sagola PSAM 250 is designed to tackle professional Airless spraying jobs with speed, precision and reliability. With a maximum working pressure of 250 bar (3,626 psi), it ensures efficient product application, delivering a consistent spray pattern and excellent finish quality.

Its compact, robust design is built to withstand continuous use under the most demanding working conditions. The four-finger trigger provides smooth, comfortable operation, reducing operator fatigue and offering greater control during long spraying sessions.

Available in two configurations, with or without swivel head. Its robust construction and highly resistant materials help extend the service life of the spray gun while ensuring reliable performance.

The possibility of using different tip sizes allows the gun to handle products with different viscosities. In addition, 30, 50, 100 and 200 mesh filter options help keep the product free from impurities and ensure continuous, uniform and stable spraying.

Sales code **301 701 09** (includes swivel head)
301 701 03 (without swivel head)
